

REMARKS:

In response to the Restriction Requirement/Election of Species Requirement dated March 24, 2010, the applicants hereby elect Group I, wherein D is pyrrolidine, G is pyridine-2-yl and no additional heterocycle is present. Applicants traverse the characterization of this group as having "no additional heterocycle." Applicants submit that additional heterocycles are included in the compounds of the invention.

The Examiner required the applicants to elect a single compound in the event of the election of Group I. The applicants hereby elect compound 5, which will be found at page 15 of the WIPO publication.

A new method of treatment claim 85 has been added for the Examiner's consideration. Written description support can be found throughout the specification, for example on pages 83 and 84.

Early and favorable action on the merits is awaited. If any additional payment is required, please charge the cost thereof to deposit account no. 02-2135.

Respectfully submitted,

By /Robert B. Murray/
